

I am a paying XM subscriber and I want to be able to keep the traffic and weather channels that XM provides. It gives me the information when I need it and not when the local broadcasters decide to give it. I pay for these services and it should not be up to the National Association of Broadcasters to dictate when I can hear information that I find useful to me. There have been several instances where it has saved me HOURS in traffic. No one else provides variety and quality that I have now come to expect with getting my traffic and weather when I need to have it.

I strongly urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I want and need.
